Stainless Steel Electronic Code Lock SS-5000 & 5500 serie

Rustfri Stål Elektronisk Kodelås SS- 5000 & 5500 serie

CodeLock SS-5500 Series

The CodeLock SS-5500 is an electronic keypad lock that offers you advanced programming and access methods.

The CodeLock can be operated using a valid code, a card or by using your blue tooth compatible smartphone simply by downloading the K3 connect app. You can also set the digital lock to code free for a period to allow anyone access without them needing a code.

All the models in the SS-5500 series share the following common features:

- Manage and operate locks via smartphone
  - Allows temporary access.
  - Create time-sensitive codes via our API (application programming interface).
- Keyless entry - no lost keys
- 12 button back-lit keypad
- NetCode® generation technology
- Set up to 10 Code Free access periods
- Suspend and restore any or all clients
- Keypad indicates locked / unlocked status
- Tamper time out and low battery warning
- Personal wireless connectivity for management
- Simple upgrade from electronic range using same fixings
- Auxiliary connections enabling four modes of operation

Managing and operating locks has never been easier.
The SS-5500 Smart Lock offers advanced programming and access methods, as well as simple retrofit opportunities for easy upgrades from the SS-5000 range
